

# Assignment 1 - Temporal Data

*Michael Francis*

## Tennis Serve Speed During a Match

Source: Francis, M (2020, July 9). [Tennis Singles Match] Retrieved from <https://github.com/MichaelFrancis23/MSDS-455-Data-Visualization/blob/master/Assignment%201/20191012-123330.json>

- Data was taken from an In/Out tennis camera on 10/12/2019 for one of my tennis matches, net balls are not captured.
- 2nd serves tend to be slower than 1st serves but are hit in more often. This corresponds with the average lower speed of serves called in.
- As a match progresses players tire and serve speed decreases
