

Assignment 2 - Categorical Data

Michael Francis

Tennis Ball Speed By Stroke

Source: Francis, M (2020, July 17). [Tennis Singles Match] Retrieved from <https://github.com/MichaelFrancis23/MSDS-455-Data-Visualization/blob/master/Assignment%202/shots.csv>

- Data was taken from an In/Out tennis camera on 10/11/2019 for one of my tennis practices using a ball machine.
- 1st serves have a higher speed than 2nd serves, forehands have a higher speed than backhands, and speed is more varied for shots hit out.
- More serves than ground strokes are hit into the net and the majority of shots are hit to the right side of the court.
